the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million.

There are a number of reasons for this. One is that the world population has increased by 1.5 billion in the last 25 years.

Another reason is that the world's population is becoming more urbanized, and this is putting more pressure on the world's food supply.

Finally, the world's population is becoming more aged, and this is also putting more pressure on the world's food supply.

There are a number of ways in which we can address these problems. One is to increase the world's food production.

Another way is to reduce the world's population. A third way is to improve the world's food distribution.

There are a number of things that we can do to improve the world's food production. One is to increase the world's agricultural output.

Another way is to improve the world's agricultural technology. A third way is to improve the world's agricultural infrastructure.

There are a number of things that we can do to reduce the world's population. One is to increase the world's birth control.

Another way is to improve the world's family planning. A third way is to improve the world's reproductive health.

There are a number of things that we can do to improve the world's food distribution. One is to increase the world's food aid.

Another way is to improve the world's food security. A third way is to improve the world's food sovereignty.

There are a number of things that we can do to improve the world's food production, reduce the world's population, and improve the world's food distribution.

One is to increase the world's agricultural output. Another way is to improve the world's agricultural technology.

A third way is to improve the world's agricultural infrastructure. There are a number of things that we can do to reduce the world's population.

One is to increase the world's birth control. Another way is to improve the world's family planning.

A third way is to improve the world's reproductive health. There are a number of things that we can do to improve the world's food distribution.

One is to increase the world's food aid. Another way is to improve the world's food security.

A third way is to improve the world's food sovereignty. There are a number of things that we can do to improve the world's food production, reduce the world's population, and improve the world's food distribution.

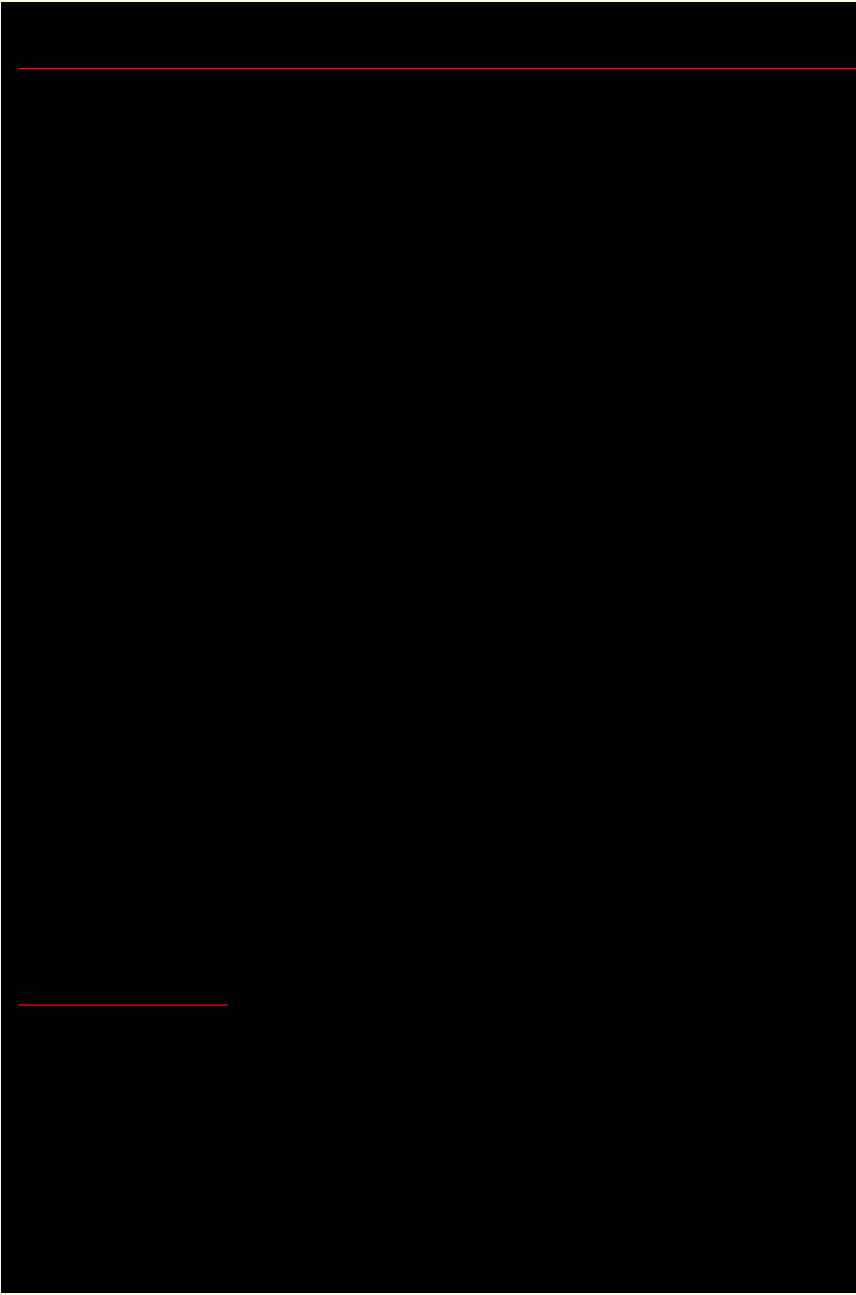

One is to increase the world's agricultural output. Another way is to improve the world's agricultural technology.

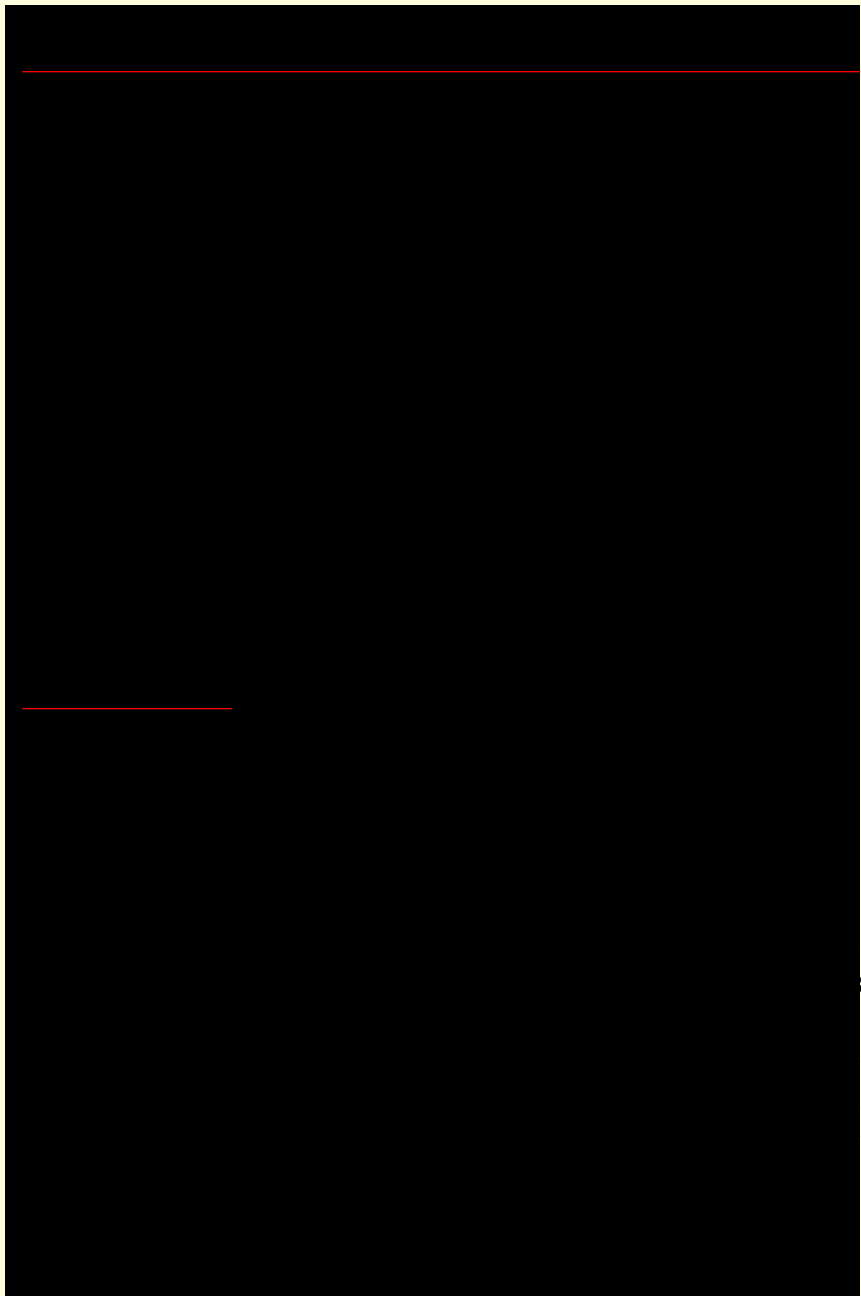

A third way is to improve the world's agricultural infrastructure. There are a number of things that we can do to reduce the world's population.

One is to increase the world's birth control. Another way is to improve the world's family planning.

A third way is to improve the world's reproductive health. There are a number of things that we can do to improve the world's food distribution.

One is to increase the world's food aid. Another way is to improve the world's food security.
